

LEGO Build Challenge

Get creative for **Somerset Flood Awareness Month** (1-31 October 2026) with our LEGO Build Challenge.

Many homes across Somerset are at risk of flooding, but great design could help us be better prepared for future emergencies. We're inviting you to imagine and build a home that could withstand a future flood. It might be raised on stilts, use plants and nature to help, be fitted with watertight doors, or packed with gadgets to keep water out.

The images below might get you started with some ideas, but once you've built your home – in real life or virtually – send us a photo of your work. The most innovative and imaginative build for each age group will win a £50 LEGO gift card — so let your creativity flow and show us what a flood-ready home could look like.

Floating LEGO house

LEGO house on stilts

To enter:

- Send a photo of the build, along with
- Entrant's FIRST name/names and group category (Age 7 and under; Age 8–11; Age 12–16, and under 16 group build)
- Parent/guardian name and contact details

To: **Bel.deering@somerset.gov.uk** by the **closing date of 30th November 2026**.

Winners will be informed in the week of 14th December 2026.

Privacy and data protection

Somerset Rivers Authority will use the information submitted only to administer and judge this competition, contact winners and arrange prizes. Please do not include a child's surname, home address, school name or a photograph showing the child. Entries and contact details will be accessible only to the competition team, stored securely and deleted after the competition and prize administration are complete. A parent or guardian must submit or approve every entry from a person under 18. Any separate use of an entrant's name, build photograph or story in publicity, websites or social media will require a clear, optional permission and will not affect judging.
